One of the most important things about this country is it's freedom of speech. To threaten that is the same as saying that you don't believe in free speech anymore. XM Radio has been a tremendous help for me since I installed it in my Semi. I can honestly say that I have, at one time or another, listened to all of the stations offered on XM. I obviously have my favorites but, being an Over the Road driver, I have come to rely very heavily on the traffic reports and the ability to tune in to any given city at any time has been very beneficial for me. I would hate to have to go back to guessing about the weather before I go there. I am strongly in favor of allowing XM Radio its full constitutional rights. Just because it's construed by the NAB to be a threat does not constitute a cessation of any of its many services. Please do not allow the FCC to approve the NAB's petition 04-160. Thank You.
Respectfully, Rodney J Danner
